---

## Career Objective

Passionate frontend developer excited to take on challenges and showcase my abilities. Seeking opportunities to grow, create engaging user experiences, and expand my skills in a dynamic environment.

## Technical Skills

**Frontend:** HTML, CSS, Tailwind CSS, JavaScript, React.js, Redux

**Backend:** Node.js, Express.js, MongoDB, JWT

**Tools:** Git, GitHub, Visual Studio, Figma, Pixso, Pycharm

**Other:** RESTful API, DaisyUI, Netlify, Vercel, Firebase, Python

## Projects

### Discount PRO

[Live](#) | [Repo](#)

A single-page application that helps users easily find, copy, and use discount coupons from popular Bangladeshi e-commerce brands.

- Sign up/login using Email/Password and Google; protected private routes using Firebase Auth.
- Users can browse, copy, and use valid coupon codes from various brands with live expiry, category, and discount info.
- Authenticated users can view and update their profile info, including name and photo.

### Peddy

[Live](#) | [Repo](#)

A responsive web app for browsing, filtering, and adopting pets, built using dynamic APIs and Tailwind CSS.

- Dynamic pet browsing by category with price sorting and real-time adoption status.
- Pet detail modal with vaccination and breed info; handles null data gracefully.
- Interactive "Like" and "Adopt" systems with responsive UI and countdown animation.

### Chill Gamer

[Live](#) | [Repo](#)

A game review web app that allows users to explore, review, and manage video games.

- Authenticated users can add, edit, and delete game reviews.
- Users can save their favorite games to a personal watchlist.
- Browse reviews by genre, rating, and year for easy discovery.

## Education

BSC in Computer Science and Engineering  
BRAC University

Sep 2017 - Sep 2023

## Languages

Bangla: Native

English: Fluent

Hindi: Intermediate
